<p style="text-align: center;">Symetra As of 2/2021</p>	<ul style="list-style-type: none"> ✓ The “tobacco” definition from “occasional” and “intermittent” user categories has been eliminated. Tobacco rates now only apply to co-nicotine use (use of both marijuana and tobacco products). Frequency of use categories are defined internally. ✓ Eligibility for a Super Preferred Non-Nicotine rate classification has expanded. It is now available for clients who are ages 26 and above, and may include “occasional” use candidates. ✓ At certain ages, intermittent users can now qualify for a Preferred Non-Nicotine rate class. ✓ THC metabolite testing is now conducted for all formal case submissions. A negative test result is required to qualify for Symetra’s best rate class. ✓ Admission of frequency and mode of use is key to being eligible for the most favorable underwriting assessment. ✓ We will be offering educational, cannabis-related underwriting webinars. <p>These changes are limited to Symetra’s fully underwritten life insurance applications. Additional guidelines are available for those using marijuana more frequently and for medicinal purposes.</p>
